

The main reason for getting XM radio in my car was the ability to listen to traffic conditions in NY. I find this service invaluable because it is available on demand. I don't need to listen to a whole bunch of nonsense on an AM channel before they give their skimpy traffic and weather report every 30 minutes or so. Also, NAB has no business in what I can or cannot listen. Please reject their petition 04-160.  
Thank you.
